Source described, then drow rough sketches of, the missile silhouette and tail fin silhouette; later, from photographs, he identified Guided Missile, Surface-to-Surface, SS-4 "Sayster," 6; I do not know where the truck convoy originated told me that Soviet cargo ships, nomes unknown, had docked at the Flota Blanca piers around 10 or 11 Sep 62. He told me that all Cuban dock-workers and other Cubans who worked in that area were forbidden to be in the area during the unloading of the ships and that the unloading was handled only by Sovbloc personnel. He said the cargo unloaded at the Flota Blanca docks consisted of missiles. I do not know where he got his information, but he is usually protty reliable. G-0-Nor-Terrentalister.L
